Vadnais Sports Dome Construction Project

More than a year after the Vadnais Sports Center's air-supported sports dome collapsed under a foot of April snow, Ramsey County is ready to act on a plan to replace the fallen structure with a sturdier facility. Mortenson is the General Contractor for the Vadnais Sport Dome construction project.

Dale Street Bridge Construction Update

The Dale Street reconstruction project has begun. Dale Street will be rebuilt between Iglehart and University Avenues and includes the bridge over I-94. Pedestrian improvements include enhanced crossings, wider sidewalks and a gentler slope approaching I-94 from University Avenue.

Week of May 25

Construction this week will continue to focus primarily on the bridge walls and center pier. There will continue to be temporary lane reductions on I-94 at the construction area for the safety of workers and to make space for the concrete trucks and placement equipment; at least two lanes will remain open in each direction. In late May and early June, trucks will bring in large bridge beams and crews will begin to set the beams in place on the east half of the bridge.

Work on the storm sewer on the east half of Dale Street between St. Anthony Avenue and University Avenue will continue during the weeks ahead. Access to the Fuller Avenue cul-de-sac entrance will be maintained when crews work in the area.

Work is nearing completion on the small retaining wall between Carroll Avenue and Concordia Avenue on the east side of Dale Street.

Contractors are still hiring for the Dale Street reconstruction project: Please apply to Redstone Construction LLC and share this information with others that may be interested.

Redstone Construction LLC is the General Contractor on the Dale Street Bridge Project.
